

ACCIDENTS HAPPEN

Caring for your patients when emergencies arise...

Has a patient ever presented to your practice after an accident? Do you feel you know the proper steps to follow to get full compensation? How you handle these cases when they first present to your practice can make all the difference in compensation and the patients out of pocket. Many offices turn away existing patients due to lack of knowledge or skill for reimbursement. This course will take you through the steps you need to take to care for existing patients or help in gaining new patients.

In this course you will learn:

- Information to gather before they even come through the door
- Questions to ask for proper documentation for swift payment
- How to bill dental codes and where to find medical codes
- Who to bill first-medical, dental, home owners or other
- System development

This course will allow you to be an efficient team while aiding your patient through a difficult time. You will learn how to feel confident in billing both Workers Compensation as well as medical and auto insurances when accidents occur. You will learn who to bill first and help decrease your patients out of pocket.

Format 1 Hour Seminar
